PROFILE

Third-year B.Tech AI & ML student with practical experience building and deploying web applications. Comfortable working across frontend and backend, connecting REST APIs, working with databases, using Git/GitHub, and deploying projects with Vercel and Render. Interested in building reliable, user-focused software and gaining professional experience in full-stack development.

PROJECTS

ULPIN Digital Twin — SIH 2026

React.js • Three.js • FastAPI • Python • REST APIs

- Built a web application to locate and visualize property parcels from ULPIN data.
- Connected the React frontend with backend APIs and created interactive 2D map and 3D property views.
- Worked with coordinates, building geometry, elevation and spatial-overlap analysis.
